

## **OPERATIONAL ANALYSIS OF WEEKLY COMMUNICABLE DISEASE INFORMATION BY AREA**

### **Week 2 (08.01.2024 – 14.01.2024 r.)**

#### **1. Salmonellosis**

The number of reported cases of Salmonellosis during week 2 of 2024 is 8. The deviation from the previous week is (2).

The reported cases are classified as confirmed.

From the beginning of the year the number of reported cases is 14. For the same period of the previous year the number of reported cases is 5. The deviation from the previous year is (9).

#### **2. Lyme disease**

The number of reported cases of Lyme disease during week 2 of 2024 is 2. The deviation from the previous week is (2).

The reported cases are classified as confirmed.

From the beginning of the year the number of reported cases is 2. For the same period of the previous year the number of reported cases is 0. The deviation from the previous year is (2).

#### **3. Gastroenteritis, enterocolitis**

The number of reported cases of Gastroenteritis, enterocolitis during week 2 of 2024 is 124. The deviation from the previous week is (36).

The reported cases are classified as: 55 possible, 68 probable and 1 confirmed.

From the beginning of the year the number of reported cases is 212. For the same period of the previous year the number of reported cases is 217. The deviation from the previous year is (-5).

#### **4. E. coli infection – escherichiosis (E.coli)**

The number of reported cases of E. coli infection – escherichiosis (E.coli) during week 2 of 2024 is 2. The deviation from the previous week is (-3).

The reported cases are classified as confirmed.

From the beginning of the year the number of reported cases is 7. For the same period of the previous year the number of reported cases is 1. The deviation from the previous year is (6).

#### **5. Scarlet fever**

The number of reported cases of Scarlet fever during week 2 of 2024 is 263. The deviation from the previous week is (175).

The reported cases are classified as: 77 possible, 98 probable and 88 confirmed.

From the beginning of the year the number of reported cases is 351. For the same period of the previous year the number of reported cases is 272. The deviation from the previous year is (79).

#### **6. Varicella**

The number of reported cases of Varicella during week 2 of 2024 is 880. The deviation from the previous week is (-51).

The reported cases are classified as: 129 possible, 539 probable and 212 confirmed.

From the beginning of the year the number of reported cases is 1811. For the same period of the previous year the number of reported cases is 2597. The deviation from the previous year is (-786).

#### **7. Shigellosis**

The number of reported cases of Shigellosis during week 2 of 2024 is 0. The deviation from the previous week is (0). From the beginning of the year the number of reported cases is 0. For the same period of the previous year the number of reported cases is 0. The deviation from the previous year is (0).

#### **9. Pertussis**

The number of reported cases of Pertussis during week 2 of 2024 is 0. The deviation from the previous week is (0). From the beginning of the year the number of reported cases is 0. For the same period of the previous year the number of reported cases is 0. The deviation from the previous year is (0).

#### **10. Leptospirosis**

The number of reported cases of Leptospirosis during week 2 of 2024 is 0. The deviation from the previous week is (0). From the beginning of the year the number of reported cases is 0. For the same period of the previous year the number of reported cases is 0. The deviation from the previous year is (0).

#### **11. Botulism**

The number of reported cases of Botulism during week 2 of 2024 is 0. The deviation from the previous week is (0). From the beginning of the year the number of reported cases is 0. For the same period of the previous year the number of reported cases is 3. The deviation from the previous year is (-3).

#### **12. Yersiniosis**

The number of reported cases of Yersiniosis during week 2 of 2024 is 1. The deviation from the previous week is (1).

The reported case is classified as confirmed.

From the beginning of the year the number of reported cases is 1. For the same period of the previous year the number of reported cases is 0. The deviation from the previous year is (1).

#### **13. Campylobacteriosis**

The number of reported cases of Campylobacteriosis during week 2 of 2024 is 3. The deviation from the previous week is (0).

The reported cases are classified as confirmed.

From the beginning of the year the number of reported cases is 6. For the same period of the previous year the number of reported cases is 1. The deviation from the previous year is (5).

#### **14. Typhoid fever**

The number of reported cases of Typhoid fever during week 2 of 2024 is 0. The deviation from the previous week is (0). From the beginning of the year the number of reported cases is 0. For the same period of the previous year the number of reported cases is 0. The deviation from the previous year is (0).

#### **15. Legionnaires` disease**

The number of reported cases of Legionnaires` disease during week 2 of 2024 is 0. The deviation from the previous week is (0). From the beginning of the year the number of reported cases is 0. For the same period of the previous year the number of reported cases is 0. The deviation from the previous year is (0).

#### **17. Congenital rubella**

The number of reported cases of Congenital rubella during week 2 of 2024 is 0. The deviation from the previous week is (0). From the beginning of the year the number of reported cases is 0. For the same period of the previous year the number of reported cases is 0. The deviation from the previous year is (0).

#### **18. Viral meningitis and meningoencephalitis**

The number of reported cases of Viral meningitis and meningoencephalitis during week 2 of 2024 is 4. The deviation from the previous week is (2).

The reported cases are classified as: 3 probable and 1 confirmed.

From the beginning of the year the number of reported cases is 6. For the same period of the previous year the number of reported cases is 4. The deviation from the previous year is (2).

#### **19. Crimean-Congo haemorrhagic fever**

The number of reported cases of Crimean-Congo haemorrhagic fever during week 2 of 2024 is 0. The deviation from the previous week is (0). From the beginning of the year the number of reported cases is 0. For the same period of the previous year the number of reported cases is 0. The deviation from the previous year is (0).

**20. Mediterranean spotted fever (Boutonneuse fever)**

The number of reported cases of Mediterranean spotted fever (Boutonneuse fever) during week 2 of 2024 is 0. The deviation from the previous week is (0). From the beginning of the year the number of reported cases is 0. For the same period of the previous year the number of reported cases is 0. The deviation from the previous year is (0).

**21. Meningococcal infection**

The number of reported cases of Meningococcal infection during week 2 of 2024 is 0. The deviation from the previous week is (0). From the beginning of the year the number of reported cases is 0. For the same period of the previous year the number of reported cases is 0. The deviation from the previous year is (0).

**22. Listeriosis**

The number of reported cases of Listeriosis during week 2 of 2024 is 0. The deviation from the previous week is (-1). From the beginning of the year the number of reported cases is 1. For the same period of the previous year the number of reported cases is 0. The deviation from the previous year is (1).

**23. Brucellosis**

The number of reported cases of Brucellosis during week 2 of 2024 is 0. The deviation from the previous week is (0). From the beginning of the year the number of reported cases is 0. For the same period of the previous year the number of reported cases is 0. The deviation from the previous year is (0).

**24. Tularaemia**

The number of reported cases of Tularaemia during week 2 of 2024 is 0. The deviation from the previous week is (0). From the beginning of the year the number of reported cases is 0. For the same period of the previous year the number of reported cases is 0. The deviation from the previous year is (0).

**25. Acute viral hepatitis ABCDEN**

The number of reported cases of Acute viral hepatitis ABCDEN during week 2 of 2024 is 16. The deviation from the previous week is (4).

The reported cases are classified as: 3 possible, 6 probable and 7 confirmed.

From the beginning of the year the number of reported cases is 28. For the same period of the previous year the number of reported cases is 32. The deviation from the previous year is (-4).

**26. Hemorrhagic fever with renal syndrome**

The number of reported cases of Hemorrhagic fever with renal syndrome during week 2 of 2024 is 0. The deviation from the previous week is (0). From the beginning of the year the number of reported cases is 0. For the same period of the previous year the number of reported cases is 0. The deviation from the previous year is (0).

**27. Q fever**

The number of reported cases of Q fever during week 2 of 2024 is 0. The deviation from the previous week is (0). From the beginning of the year the number of reported cases is 0. For the same period of the previous year the number of reported cases is 3. The deviation from the previous year is (-3).

**28. Ornithosis**

The number of reported cases of Ornithosis during week 2 of 2024 is 0. The deviation from the previous week is (0). From the beginning of the year the number of reported cases is 0. For the same period of the previous year the number of reported cases is 0. The deviation from the previous year is (0).

**29. Tetanus**

The number of reported cases of Tetanus during week 2 of 2024 is 0. The deviation from the previous week is (0). From the beginning of the year the number of reported cases is 0. For the same period of the previous year the number of reported cases is 0. The deviation from the previous year is (0).

**30. Anthrax**

The number of reported cases of Anthrax during week 2 of 2024 is 0. The deviation from the previous week is (0). From the beginning of the year the number of reported cases is 0. For the same period of the previous year the number of reported cases is 0. The deviation from the previous year is (0).

**31. Pneumococcal meningitis**

The number of reported cases of Pneumococcal meningitis during week 2 of 2024 is 1. The deviation from the previous week is (1).

The reported case is classified as confirmed.

From the beginning of the year the number of reported cases is 1. For the same period of the previous year the number of reported cases is 1. The deviation from the previous year is (0).

**32. Streptococcal meningitis**

The number of reported cases of Streptococcal meningitis during week 2 of 2024 is 0. The deviation from the previous week is (0). From the beginning of the year the number of reported cases is 0. For the same period of the previous year the number of reported cases is 0. The deviation from the previous year is (0).

**33. Haemophilus influenzae meningitis**

The number of reported cases of Haemophilus influenzae meningitis during week 2 of 2024 is 0. The deviation from the previous week is (0). From the beginning of the year the number of reported cases is 0. For the same period of the previous year the number of reported cases is 0. The deviation from the previous year is (0).

**34. Bacterial meningitis (other bacteria)**

The number of reported cases of Bacterial meningitis (other bacteria) during week 2 of 2024 is 1. The deviation from the previous week is (0).

The reported case is classified as probable.

From the beginning of the year the number of reported cases is 2. For the same period of the previous year the number of reported cases is 2. The deviation from the previous year is (0).

**35. Rotavirus gastroenteritis**

The number of reported cases of Rotavirus gastroenteritis during week 2 of 2024 is 6. The deviation from the previous week is (-2).

The reported cases are classified as confirmed.

From the beginning of the year the number of reported cases is 14. For the same period of the previous year the number of reported cases is 15. The deviation from the previous year is (-1).

**37. SHIGA/VERO toxin producing E. coli infection (STEC/VTEC)**

The number of reported cases of SHIGA/VERO toxin producing E. coli infection (STEC/VTEC) during week 2 of 2024 is 0. The deviation from the previous week is (0). From the beginning of the year the number of reported cases is 0. For the same period of the previous year the number of reported cases is 0. The deviation from the previous year is (0).

**38. West Nile virus**

The number of reported cases of West Nile virus during week 2 of 2024 is 0. The deviation from the previous week is (0). From the beginning of the year the number of reported cases is 0. For the same period of the previous year the number of reported cases is 0. The deviation from the previous year is (0).

**39. Tick-borne Encephalitis**

The number of reported cases of Tick-borne Encephalitis during week 2 of 2024 is 0. The deviation from the previous week is (0). From the beginning of the year the number of reported cases is 0. For the same period of the previous year the number of reported cases is 0. The deviation from the previous year is (0).

**40. *Pneumococcal invasive disease***

The number of reported cases of Pneumococcal invasive disease during week 2 of 2024 is 0. The deviation from the previous week is (0). From the beginning of the year the number of reported cases is 0. For the same period of the previous year the number of reported cases is 0. The deviation from the previous year is (0).

**41. *Variant of Creutzfeld-Jakob***

The number of reported cases of Variant of Creutzfeld-Jakob during week 2 of 2024 is 0. The deviation from the previous week is (0). From the beginning of the year the number of reported cases is 0. For the same period of the previous year the number of reported cases is 0. The deviation from the previous year is (0).

**42. *COVID-19***

The number of reported cases of COVID-19 during week 2 of 2024 is 1073. The deviation from the previous week is (-273).

The reported cases are classified as confirmed.

From the beginning of the year the number of reported cases is 2419. For the same period of the previous year the number of reported cases is 1719. The deviation from the previous year is (700).

**43. *Lyme neuroborreliosis***

The number of reported cases of Lyme neuroborreliosis during week 2 of 2024 is 0. The deviation from the previous week is (0). From the beginning of the year the number of reported cases is 0. For the same period of the previous year the number of reported cases is 0. The deviation from the previous year is (0).

**44. *Monkeypox***

The number of reported cases of Monkeypox during week 2 of 2024 is 0. The deviation from the previous week is (0). From the beginning of the year the number of reported cases is 0. For the same period of the previous year the number of reported cases is 0. The deviation from the previous year is (0).

# NCIPD – DEPARTEMENT OF EPIDEMIOLOGY

Брой заболели от Дизентерия (шигелоза) по седмици в Република България  
Reported cases of Shigellosis by weeks in Bulgaria

Брой заболели от Гастроентерит, ентероколит по седмици в Република България  
Reported cases of Gastroenteritis, enterocolitis by weeks in Bulgaria

Брой заболели от Колиентерити (ешерихиози) по седмици в Република България  
Reported cases of E. coli infection – escherichiosis (E.coli) by weeks in Bulgaria

Брой заболели от Остър вирусен хепатит ABCDE по седмици в Република България  
Reported cases of Acute viral hepatitis ABCDEN by weeks in Bulgaria

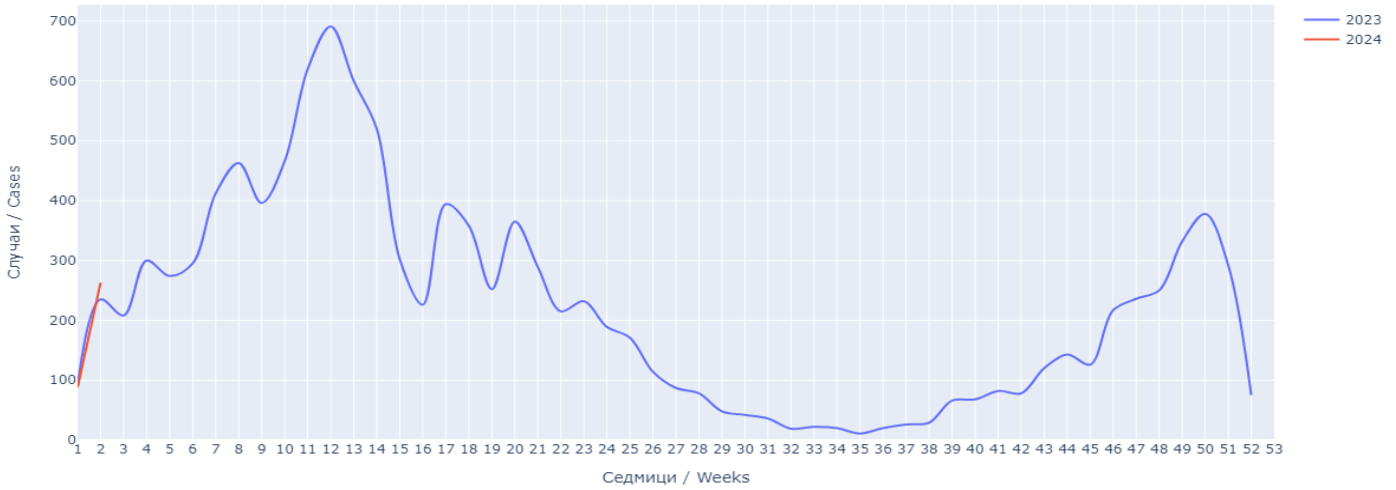

Брой заболели от Лаймска борелиоза по седмици в Република България  
Reported cases of Lyme disease by weeks in Bulgaria

Брой заболели от Салмонелоза по седмици в Република България  
Reported cases of Salmonellosis by weeks in Bulgaria

Брой заболели от Скарлатина по седмици в Република България  
Reported cases of Scarlet fever by weeks in Bulgaria

Брой заболели от Варицела по седмици в Република България  
Reported cases of Varicella by weeks in Bulgaria

Брой заболели от Вирусни менингити и менингоенцефалити по седмици в Република България  
Reported cases of Viral meningitis and meningoencephalitis by weeks in Bulgaria
