

OPERATIONAL ANALYSIS OF WEEKLY COMMUNICABLE DISEASE INFORMATION BY AREA

Week 6 (05.02.2024 – 11.02.2024 r.)

1. Salmonellosis

The number of reported cases of Salmonellosis during week 6 of 2024 is 5. The deviation from the previous week is (0).

The reported cases are classified as confirmed.

From the beginning of the year the number of reported cases is 34. For the same period of the previous year the number of reported cases is 29. The deviation from the previous year is (5).

2. Lyme disease

The number of reported cases of Lyme disease during week 6 of 2024 is 1. The deviation from the previous week is (-2).

The reported cases are classified as confirmed.

From the beginning of the year the number of reported cases is 7. For the same period of the previous year the number of reported cases is 5. The deviation from the previous year is (2).

3. Gastroenteritis, enterocolitis

The number of reported cases of Gastroenteritis, enterocolitis during week 6 of 2024 is 100. The deviation from the previous week is (10).

The reported cases are classified as: 45 possible, 47 probable and 8 confirmed.

From the beginning of the year the number of reported cases is 630. For the same period of the previous year the number of reported cases is 600. The deviation from the previous year is (30).

4. E. coli infection – escherichiosis (E.coli)

The number of reported cases of E. coli infection – escherichiosis (E.coli) during week 6 of 2024 is 2. The deviation from the previous week is (-4).

The reported cases are classified as confirmed.

From the beginning of the year the number of reported cases is 26. For the same period of the previous year the number of reported cases is 18. The deviation from the previous year is (8).

5. Scarlet fever

The number of reported cases of Scarlet fever during week 6 of 2024 is 273. The deviation from the previous week is (-69).

The reported cases are classified as: 94 possible, 120 probable and 59 confirmed.

From the beginning of the year the number of reported cases is 1552. For the same period of the previous year the number of reported cases is 1334. The deviation from the previous year is (218).

6. Varicella

The number of reported cases of Varicella during week 6 of 2024 is 815. The deviation from the previous week is (136).

The reported cases are classified as: 114 possible, 539 probable and 162 confirmed.

From the beginning of the year the number of reported cases is 4820. For the same period of the previous year the number of reported cases is 6605. The deviation from the previous year is (-1785).

7. Shigellosis

The number of reported cases of Shigellosis during week 6 of 2024 is 0. The deviation from the previous week is (0). From the beginning of the year the number of reported cases is 1. For the same period of the previous year the number of reported cases is 1. The deviation from the previous year is (0).

9. Pertussis

The number of reported cases of Pertussis during week 6 of 2024 is 4. The deviation from the previous week is (2).

The reported cases are classified as: 1 possible and 3 confirmed.

From the beginning of the year the number of reported cases is 10. For the same period of the previous year the number of reported cases is 1. The deviation from the previous year is (9).

10. Leptospirosis

The number of reported cases of Leptospirosis during week 6 of 2024 is 0. The deviation from the previous week is (0). From the beginning of the year the number of reported cases is 0. For the same period of the previous year the number of reported cases is 0. The deviation from the previous year is (0).

11. Botulism

The number of reported cases of Botulism during week 6 of 2024 is 0. The deviation from the previous week is (0). From the beginning of the year the number of reported cases is 0. For the same period of the previous year the number of reported cases is 4. The deviation from the previous year is (-4).

12. Yersiniosis

The number of reported cases of Yersiniosis during week 6 of 2024 is 1. The deviation from the previous week is (-1).

The reported case is classified as confirmed.

From the beginning of the year the number of reported cases is 6. For the same period of the previous year the number of reported cases is 1. The deviation from the previous year is (5).

13. Campylobacteriosis

The number of reported cases of Campylobacteriosis during week 6 of 2024 is 6. The deviation from the previous week is (4).

The reported cases are classified as confirmed.

From the beginning of the year the number of reported cases is 22. For the same period of the previous year the number of reported cases is 7. The deviation from the previous year is (15).

14. Typhoid fever

The number of reported cases of Typhoid fever during week 6 of 2024 is 0. The deviation from the previous week is (0). From the beginning of the year the number of reported cases is 0. For the same period of the previous year the number of reported cases is 0. The deviation from the previous year is (0).

15. Legionnaires` disease

The number of reported cases of Legionnaires` disease during week 6 of 2024 is 0. The deviation from the previous week is (0). From the beginning of the year the number of reported cases is 1. For the same period of the previous year the number of reported cases is 0. The deviation from the previous year is (1).

17. Congenital rubella

The number of reported cases of Congenital rubella during week 6 of 2024 is 0. The deviation from the previous week is (0). From the beginning of the year the number of reported cases is 0. For the same period of the previous year the number of reported cases is 0. The deviation from the previous year is (0).

18. Viral meningitis and meningoencephalitis

The number of reported cases of Viral meningitis and meningoencephalitis during week 6 of 2024 is 0. The deviation from the previous week is (-3). From the beginning of the year the number of reported cases is 12. For the same period of the previous year the number of reported cases is 13. The deviation from the previous year is (-1).

19. Crimean-Congo haemorrhagic fever

The number of reported cases of Crimean-Congo haemorrhagic fever during week 6 of 2024 is 0. The deviation from the previous week is (0). From the beginning of the year the number of reported cases is 0.

For the same period of the previous year the number of reported cases is 0. The deviation from the previous year is (0).

20. Mediterranean spotted fever (*Boutonneuse fever*)

The number of reported cases of Mediterranean spotted fever (*Boutonneuse fever*) during week 6 of 2024 is 0. The deviation from the previous week is (0). From the beginning of the year the number of reported cases is 0. For the same period of the previous year the number of reported cases is 0. The deviation from the previous year is (0).

21. Meningococcal infection

The number of reported cases of Meningococcal infection during week 6 of 2024 is 0. The deviation from the previous week is (0). From the beginning of the year the number of reported cases is 0. For the same period of the previous year the number of reported cases is 1. The deviation from the previous year is (-1).

22. Listeriosis

The number of reported cases of Listeriosis during week 6 of 2024 is 1. The deviation from the previous week is (1).

The reported cases are classified as confirmed.

From the beginning of the year the number of reported cases is 3. For the same period of the previous year the number of reported cases is 2. The deviation from the previous year is (1).

23. Brucellosis

The number of reported cases of Brucellosis during week 6 of 2024 is 0. The deviation from the previous week is (0). From the beginning of the year the number of reported cases is 0. For the same period of the previous year the number of reported cases is 0. The deviation from the previous year is (0).

24. Tularemia

The number of reported cases of Tularemia during week 6 of 2024 is 1. The deviation from the previous week is (1).

The reported case is classified as confirmed.

From the beginning of the year the number of reported cases is 1. For the same period of the previous year the number of reported cases is 0. The deviation from the previous year is (1).

25. Acute viral hepatitis ABCDEN

The number of reported cases of Acute viral hepatitis ABCDEN during week 6 of 2024 is 10. The deviation from the previous week is (-5).

The reported cases are classified as: 4 possible, 2 probable and 4 confirmed.

From the beginning of the year the number of reported cases is 73. For the same period of the previous year the number of reported cases is 116. The deviation from the previous year is (-43).

26. Hemorrhagic fever with renal syndrome

The number of reported cases of Hemorrhagic fever with renal syndrome during week 6 of 2024 is 0. The deviation from the previous week is (0). From the beginning of the year the number of reported cases is 0. For the same period of the previous year the number of reported cases is 0. The deviation from the previous year is (0).

27. Q fever

The number of reported cases of Q fever during week 6 of 2024 is 0. The deviation from the previous week is (0). From the beginning of the year the number of reported cases is 4. For the same period of the previous year the number of reported cases is 7. The deviation from the previous year is (-3).

28. Ornithosis

The number of reported cases of Ornithosis during week 6 of 2024 is 0. The deviation from the previous week is (0). From the beginning of the year the number of reported cases is 0. For the same period of the previous year the number of reported cases is 0. The deviation from the previous year is (0).

29. Tetanus

The number of reported cases of Tetanus during week 6 of 2024 is 0. The deviation from the previous week is (0). From the beginning of the year the number of reported cases is 0. For the same period of the previous year the number of reported cases is 0. The deviation from the previous year is (0).

30. Anthrax

The number of reported cases of Anthrax during week 6 of 2024 is 0. The deviation from the previous week is (0). From the beginning of the year the number of reported cases is 0. For the same period of the previous year the number of reported cases is 1. The deviation from the previous year is (-1).

31. Pneumococcal meningitis

The number of reported cases of Pneumococcal meningitis during week 6 of 2024 is 0. The deviation from the previous week is (-2). From the beginning of the year the number of reported cases is 3. For the same period of the previous year the number of reported cases is 3. The deviation from the previous year is (0).

32. Streptococcal meningitis

The number of reported cases of Streptococcal meningitis during week 6 of 2024 is 0. The deviation from the previous week is (0). From the beginning of the year the number of reported cases is 0. For the same period of the previous year the number of reported cases is 2. The deviation from the previous year is (-2).

33. Haemophilus influenzae meningitis

The number of reported cases of Haemophilus influenzae meningitis during week 6 of 2024 is 0. The deviation from the previous week is (0). From the beginning of the year the number of reported cases is 0. For the same period of the previous year the number of reported cases is 0. The deviation from the previous year is (0).

34. Bacterial meningitis (other bacteria)

The number of reported cases of Bacterial meningitis (other bacteria) during week 6 of 2024 is 0. The deviation from the previous week is (0). From the beginning of the year the number of reported cases is 3. For the same period of the previous year the number of reported cases is 4. The deviation from the previous year is (-1).

35. Rotavirus gastroenteritis

The number of reported cases of Rotavirus gastroenteritis during week 6 of 2024 is 10. The deviation from the previous week is (6).

The reported cases are classified as: 1 probable and 9 confirmed.

From the beginning of the year the number of reported cases is 38. For the same period of the previous year the number of reported cases is 38. The deviation from the previous year is (0).

37. SHIGA/VERO toxin producing E. coli infection (STEC/VTEC)

The number of reported cases of SHIGA/VERO toxin producing E. coli infection (STEC/VTEC) during week 6 of 2024 is 0. The deviation from the previous week is (0). From the beginning of the year the number of reported cases is 0. For the same period of the previous year the number of reported cases is 0. The deviation from the previous year is (0).

38. West Nile virus

The number of reported cases of West Nile virus during week 6 of 2024 is 0. The deviation from the previous week is (0). From the beginning of the year the number of reported cases is 0. For the same period of the previous year the number of reported cases is 0. The deviation from the previous year is (0).

39. Tick-borne Encephalitis

The number of reported cases of Tick-borne Encephalitis during week 6 of 2024 is 0. The deviation from the previous week is (0). From the beginning of the year the number of reported cases is 0. For the same period of the previous year the number of reported cases is 0. The deviation from the previous year is (0).

40. Pneumococcal invasive disease

The number of reported cases of Pneumococcal invasive disease during week 6 of 2024 is 0. The deviation from the previous week is (0). From the beginning of the year the number of reported cases is 0. For the same period of the previous year the number of reported cases is 0. The deviation from the previous year is (0).

41. Variant of Creutzfeldt-Jakob

The number of reported cases of Variant of Creutzfeldt-Jakob during week 6 of 2024 is 0. The deviation from the previous week is (0). From the beginning of the year the number of reported cases is 0. For the same period of the previous year the number of reported cases is 0. The deviation from the previous year is (0).

42. COVID-19

The number of reported cases of COVID-19 during week 6 of 2024 is 317. The deviation from the previous week is (-125).

The reported cases are classified as confirmed.

From the beginning of the year the number of reported cases is 4713. For the same period of the previous year the number of reported cases is 3566. The deviation from the previous year is (1147)

43. Lyme neuroborreliosis

The number of reported cases of Lyme neuroborreliosis during week 6 of 2024 is 0. The deviation from the previous week is (0). From the beginning of the year the number of reported cases is 0. For the same period of the previous year the number of reported cases is 0. The deviation from the previous year is (0).

44. Monkeypox

The number of reported cases of Monkeypox during week 6 of 2024 is 0. The deviation from the previous week is (0). From the beginning of the year the number of reported cases is 0. For the same period of the previous year the number of reported cases is 0. The deviation from the previous year is (0).

45. Denga

The number of reported cases of Denga during week 6 of 2024 is 0. The deviation from the previous week is (0). From the beginning of the year the number of reported cases is 1. For the same period of the previous year the number of reported cases is 0. The deviation from the previous year is (1).

Брой заболели от Дизентерия (шигелоза) по седмици в Република България
Reported cases of Shigellosis by weeks in Bulgaria

Брой заболели от Гастроентерит, ентероколит по седмици в Република България
Reported cases of Gastroenteritis, enterocolitis by weeks in Bulgaria

Брой заболели от Колиентерити (ешерихиози) по седмици в Република България
Reported cases of E. coli infection – escherichiosis (E.coli) by weeks in Bulgaria

NCIPD – DEPARTEMENT OF EPIDEMIOLOGY

Брой заболели от Остър вирусен хепатит ABCDE по седмици в Република България
Reported cases of Acute viral hepatitis ABCDEN by weeks in Bulgaria

Брой заболели от Лаймска борелиоза по седмици в Република България
Reported cases of Lyme disease by weeks in Bulgaria

Брой заболели от Салмонелоза по седмици в Република България
Reported cases of Salmonellosis by weeks in Bulgaria
